Office Action Summary

Art Unit 1754

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-13, drawn to an apparatus for the production of synthesis gas, classified in Class 422, subclass 211.

II. Claims 14-24, drawn to a process for the production of synthesis gas, classified in Class 252, subclass 373.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus, such as one in which the first heat exchanger, the second heat exchanger, and the oxygen transport membrane tubes are not each supported within the reactor vessel independently of one another so that each can independently expand or contract. Moreover, the process could be practiced in an apparatus in which the oxygen transport membranes are not in the form of tubes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by

Art Unit 1754

their different classifications, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, and vice versa, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wayne A. Langel whose telephone number is (703) 308-0248. The examiner can normally be reached on Monday through Friday from 8 A.M. to 3:30 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley Silverman, can
